189. Rotate Array

The easiest way of approaching this would be to do the push pop method

or you could create another array and store the values there based on that.

Neetcode solution

O(n) space complexity

Res = [ ] $K=2$

$(i+2)\%$ len(nums)

add name in Res then copy back into nums

O(1) space

$K=2$

[1, 2, 3, 4, 5] [5, 4, 3, 2, 1]
