274. H-index

I had trouble attempting this problem

Intuitive solution

brute force start from 0 to n (size of array) and try to find h index) O(n²)

[5, 1, 2, 8, 9, 3]

paper_counts = [0 1 1 1 0 1 2] n = 6

0 1 2 3 4 5 6 we had 7 jobs

h = 3 ✓ papers = 4 in case it takes 0-0

O(n)

both space and time
